

List All Reports

List of Shared Reports Displaying:

Report name, Description, Last published date, Product ,Number of associated recent files

Expected behavior of download files :

I can only download recent files from a report.

Example: If a report initially contains 5 files, then 2 new files are added, these last 2 are considered recent files and only these will be available for download via the global list of shared reports.

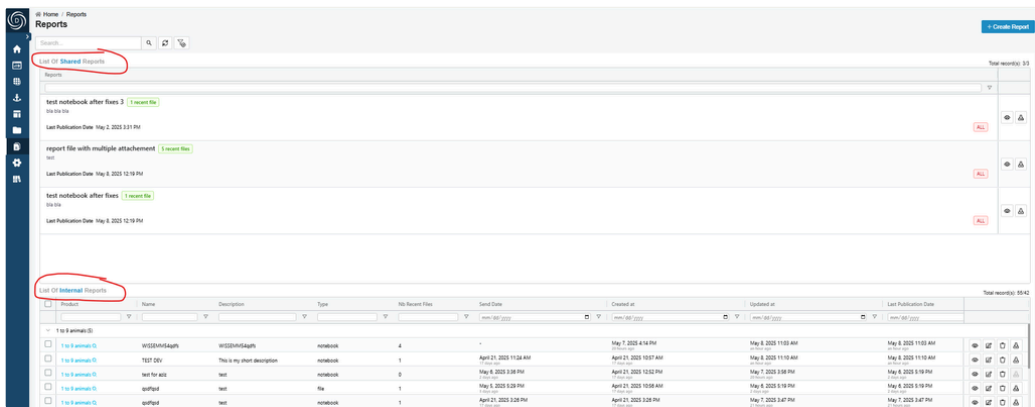

If recent files are deleted, the previous files become the new recent files.

If no files are available as recent, the download button appears grayed out, indicating that no files can be downloaded from this view.

List of Internal Report Displaying:

Product ,Name, Description, Type (file or notebook) , Last published date, Nombre recent Files, Send Date (the last date of sending the file by delivery) , Created at , Update At, Last publication Date,

also we just download the recent files

The screenshot shows a web application interface for managing reports. It features a sidebar with navigation icons and a main content area. The 'Reports' section is active, displaying two tabs: 'List Of Shared Reports' and 'List Of Internal Reports'. The 'List Of Shared Reports' tab is selected, showing a list of reports with columns for Name, Description, Type, No Recent Files, Send Date, Created at, Updated at, and Last Publication Date. The 'List Of Internal Reports' tab is also visible, showing a similar list of reports. The interface includes search and filter options at the top of the report lists.

Report Name	Description	Type	No Recent Files	Send Date	Created at	Updated at	Last Publication Date
test notebook after files 3		notebook	4	April 21, 2023 11:34 AM	May 7, 2023 4:14 PM	May 8, 2023 11:10 AM	May 8, 2023 11:10 AM
